SECTION A - SUPPLEMENTAL INFORMATION

This modification P00009 is entered into at no cost to the Government to correct a cable interface deficiency with the delivered tank target mechanisms (TTMs).

1. Paragraph 3.3.1.1.4, Interface, of the contract performance description sets forth the specific interface requirements for TTM. In particular, subparagraph 3.3.1.1.4.d states:

"When used with MILES, it will receive hit signals. A hit will be recorded upon receiving from a MILES System, a square pulse which is 7.0 to 14.0 volts by 50 milliseconds or longer on pins A and B of connectors equivalent to Figure 9."

2. Based on the above, the contractual requirement is that the TTM, when used with MILES, "will receive hit signals." This is an actual hardware requirement.

3. The TTM systems delivered under this contract were lacking an interface cable to connect the MILES signal to the ECU of the TTM. This needed cable is not part of the MILES system. Therefore, when used with the MILES configuration, the delivered TTMs would not receive the MILES signals, as required by the performance description. Although the delivered TTMs were capable of understanding the MILES signal, they were not capable of receiving it (due to the lack of the required interface cable).

4. Following review of the above situation and discussions between the Contractor and the Government, Lockheed Martin offered to provide 458 each (one per delivered TTM) production cables (Part Number 15704680) under the following terms and conditions:

(1) Shipping point will be FOB Origin.

(2) Since all shipments will be FOB Origin, the Government will furnish transportation routing instructions via Government Bill of Lading (GBL) for any OCONUS shipments to Germany and Korea. Accordingly, Lockheed Martin will not be required to obtain a permanent export license (DSP-5) from the U.S. State Department.

(3) Lockheed Martin will furnish a Certificate of Conformance (COC) along with a DD 250 marked "NSP" with final inspection and acceptance of the cable at Origin. The DCM QAR will perform only a physical condition and count of the hardware. No functional or environmental testing of the cable will be required, but the cable will be fit for its intended purpose and will meet the specified drawing requirements.

(4) Delivery of all 458 each cables will be completed within 120 DAC.

(5) These changes will be incorporated to the contract with the above terms and conditions at no additional cost to the Government.

5. Lockheed Martin will ship the 458 cables (via GBL) to the following locations:

a. Ft. Stewart, GA
QTY: 32
POC: John Waltz
ADDRESS: DDT Range Division
ATTN: John Waltz
2251 Georgia Hwy 144E
Ft. Stewart, Ga. 31314

b. Schofield, HI
QTY: 12
POC: Rodney Ikemoto
ADDRESS: 25th ID (L) & USARHAW
G3/DPTM Range Division
Attn: Mr. Ikemoto
Schofield Barracks
Hawaii 96857-5000

c. Korea
QTY: 98
POC: Tim Ryan/Jerry Cox
ADDRESS: Range Control
Bldg #T-107, Attn: Jerry Cox
Cp Carroll (Weagwan, Korea)
APO AP 96260
